Pre-fill for solvent based coatings with 275 ml of propellant, solvent and additives with capacity of 100 ml of paint.

- spray can pre-filled with suitable propellant and thinner for filling with paint
- with special aerosol head for paint application

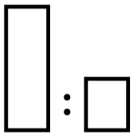

Technical data sheet 2025-2

9584 Prefill DME

Substrate preparation

Surface must be clean, dry and free of grease and dust.

Mixing ratio

The product is ready for use!	
Amount of propellant:	275 ml
Suitable for 100 ml of paint	

Spraygun setup

Shake the aerosol before use for 2 minutes.	
Aerosol pressure:	3,5 bar (20 °C/68 °F)
Spraying distance:	15 - 20 cm
Spray several thin coats at the recommended distance.	
Important: the thinner the paint coat is applied, the better is the temperature-resistance and adhesion. No primer needed. The best results is achieved at the application on bare metal! It is strongly recommended that ready for use product is applied at a temperature higher than 15 °C/59 °F.	
Slight colour differences may occur.	
After spraying turn the can upside down and spray until the valve is clean. It is strongly recommended that ready to use product is applied at temperature above 15 °C/59 °F.	

Drying

In the case of forced drying drying time depends on used quality of paint.
Recoatable with 1K or 2K clear coats.

Packaging

Product number	Description	Volume/Weight	Packaging
9584	Pre-fill	400 mL	12

Shelf life

Min. 24 months from the production date under normal storage conditions and unopened can.

Additional information

FOR PROFESSIONAL USE ONLY!

Always read the instructions.

IMPORTANT: This product contains hazardous substances at work so it is necessary to always use/wear appropriate protective equipment. For further instructions, check the label on the product and safety data sheet. A person who uses the product for any purpose other than recommended in this technical data sheet, acts at his own risk. It is the user's responsibility to take all necessary steps to fulfil the local legislation.
